

CLEANING & LUBRICATION PRODUCTS

935 - 937 - 938 Tef-Lube

Aervoe's best - A multi component lubrication with Teflon. The high friction load provides unsurpassed protection that stops sticking and grating. Use to achieve superior lubricity on all metal components. Superb corrosion protection.

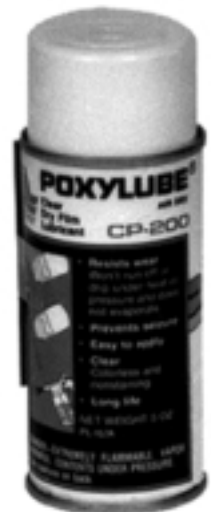

400 Spot Cleaner and Degreaser

An economical cleaner for spot degreasing. High pressure spray flushes away dirt and grime. Reaches difficult areas without disassembly. Use on metal parts, locks, motors, chains and hard plastic surfaces. Fast drying formula can be used in place of harsh solvents.

POX001 The dry film Lubricant for the lock industry

Poxylube CP200 is ideal for key lock products, because it can be used as more than just a final step treatment. Poxylube CP200 is also the best lubricant for use in the field to assure continued trouble free performance from your locks. Recommended for all high security locks.
